Iacobucci HF Aerospace: the art to enhance the journey on board a business jet.

October 21st, 2014 – Ferentino (FR) ITALY. Iacobucci HF Aerospace is pleased to display at this year NBAA event (Booth 3081), its new line of high quality, comfortable, Italian style VIP seats together with top of the art, bespoke business jet's galley inserts; products designed to enhance the passenger life on board a corporate jet - seat line-up includes 5 different seat models, 16G certified, installable in different aircraft model and cabin configuration - galley inserts range for private jets includes the best espresso makers in the market and the revolutionary induction oven, the only one available in the industry to prepare freshly made dishes in the sky: must haves' for private jet customers.

The Italian company Iacobucci HF Aerospace offers private jet customers personalized & integrated cabin solutions that go beyond quality and performance: elegant, customized, functional cabin solutions and products - made in Italy - that enhance tangible and intangible benefits of private jet world such as luxury and exclusivity. An internal division of qualified professionals creates and develops products for the business jet market only, responding to an increasing demand of product customization and changing market environment. Marketers, designers and engineers, collaborating openly with business jet customers, turn concepts and ideas into premium products of superior quality, performance, style and details. As proof of recognition, most VIP aircraft, presidential, royal fleet jets and most important OEMs have already installed Iacobucci HF Aerospace inserts and seats on board their business aircraft.

The seating product line, the latest to join the successful company products portfolio now represents a key business division for the company. From the first prototype designed in collaboration with Designworks USA, BMW Group, presented at NBAA in 2010, Iacobucci HF Aerospace seating business has quickly found a position in the market of VIP seats and a number of customers have already installed its innovative VIP seating products. Collaborating with the company designers and engineers, customers are able to define and purchase unique products with the highest quality and comfort for an exclusive and premium experience on board.

Working on large business jets projects, the company has designed and certified a full line of VIP shell seats, a Single, a Double and a Super Lounge seat with ottoman which can be offered in different configurations, functions, styles and finishing. These products offer top comfort, innovative features, different optional to choose from, providing the highest level of personalization in response to customers' need and expectations. The company's seats in display at NBAA 2014 will be the **Venezia Super Lounge Seat**, **Roma Double Seat** with full shell, electromechanically operated, in addition to the **Single Mechanical Seat**, **Alba** and the **Double mechanical Seat**, **Portofino**.

The range is completed by the latest seat model developed and realized in collaboration with PIAGGIO Aero for the new Avanti EVO model. The seats, made for medium size jet, are electromechanically operated and provide superior comfort thanks to flexible back and headrests and extendable leg rest.

At the show we will have on display the **complete range of Iacobucci HF Aerospace Espresso machines and coffee makers** specifically designed for business aircrafts. Since 1994, the company's supplies VIP customers with the best machines in the market to serve creamy Italian espresso and cappuccino or American coffee on board their private aircraft. The single or double Espresso & Cappuccino Makers (28V and 115V variable frequency) are developed to be easy to use and extremely reliable overtime. The range of coffee makers includes HFA successful line both with external

tank or connected to aircraft water system. Thanks to the patented heat exchange system all machines drew the best coffee in the market, a delicious taste experience of coffee on board

NBAA 2014 will also be the perfect occasion for customers to find out more about the incredible potentials of the **Iacobucci HF Aerospace Gusto Oven**, the first and only induction oven series for business aircrafts and large jets to cook five stars dishes in the sky. Come for a demo of the oven: the on board cooking revolution in aerospace industry. Besides its functionalities which allows to prepare fresh meals like in a five star restaurant on board a jet, the patented induction system technology is safer, as the oven is not hot in any of its parts during operation and allows a quicker for food re-heating service. *Gusto* has been developed for fresh on board preparation and is suitable for roasting fish and meat or either toasting, grilling and steaming every kind of food. The induction oven is already successfully installed on board many private jets and represents a further step of the company which continues to launch innovative products to improve the life of passengers on board an aircraft.
