

IACOBUCCI HF AEROSPACE S.p.a. , a leading company in the production of aircraft interiors, is looking for a **Production Engineer**.

Reporting directly to the Accountable Manager, the resource will be responsible for the following activities:

- provides for the collection of applicable project data (drawings, material lists, etc);
- supports the designer of the APtoDOA organization so that he can fulfill his responsibilities at every single stage of product development, including the test article stage;
- translates the information that defines the project into documents or processing schemes (manufacturing data) that allow for the creation of a compliant product and manages the updating of the working documentation;
- makes the documentation to be attached to the purchase order for suppliers available to the purchasing department;
- collaborates with the Production Manager in order to define the production processes while maintaining compliance with the project data;
- notifies the Production Manager of the presence of non-conformities;
- manages the technical files of the personnel belonging to the function, which remain available for consultation by interested parties and the aeronautical authorities.

The ideal candidate should have the following requirements:

- Degree in Mechanical, Aeronautical or Electronic Engineering
- At least 5 years' experience in the same role, preferably in aeronautical companies
- Fluency in English
- Knowledge of production processes related to mechanical machining and assembly
- Ability to evaluate and process the technical documentation
- Knowledge of aeronautical regulations
- Knowledge of the requirements of the EN9100 standard
