## Iacobucci HF Group presents the MGS new microwave for commercial airlines.

June 27<sup>th</sup>, 2011 – Ferentino (FR), ITALY – IACOBUCCI HF Group, presents its brand new **Microwave for commercial aircrafts** produced by MGS, Modular Galley System company, a wholly owned subsidiary of the Group. This compact, high-technology and innovative product was conceived to complement the successful MGS induction oven series, the Multifunctional Heating Units and the Cooking station which has brought to the market a new dimension of food on board for both commercial and general aviation.

During the Aircraft Interiors 2011 in Seattle, Iacobucci HF Group will present the new MGS creation: the MWO (P/N 00294) microwave product that will set new standards in the aircraft market. This **brand new product is extremely light, with only 14 kg of empty weight**, and is the perfect complement to rapidly reheat every kind of food. The microwave has an optimized internal volume with over 12 litres of cavity capacity to maximize usability.

Perfect complement to the Induction series, this newly developed MGS Microwave has no rotating plate, this allows to save energy and reduces maintenance costs. It also has a **programmable digit pad** with a software that enable customizing client's programs according to their needs: from "Popcorn" heating program, to "Defrosting" and "Baby Bottle Heating" or it can manually programmed to adjust power level and time. The MGS Microwave is extremely reliable and very simple to use.

MGS Microwave MWO does not only meet all the requirements of the ARINC Standards ARINC 810 and 812, but it will also successfully communicate with future galley inserts as required for the new Airbus A350 aircraft platform

At the expo together with the new microwave, the group will display the **MGS Multifunctional Unit series - the 3 and the 4 layers models - and the cooking induction top**. With the support of the Iacobucci HF group, MGS are also developing a winning product with unique features: the Multifunctional Unit ARINC size 4, a space-saving solution for commercial aircraft. This unit provides the same features of the previous series but in a compact version, meeting all the requirements of the ARINC Standards 810 and 812.

---

**PRESS OFFICE**

**The MFU unit** has gained three Mercury Awards, thanks to its ground-breaking heating technology that uses the induction technology for steam cooking: induction significantly speeds up the cooking process, while steam conserves vitamins and retains appetizing colors, preventing drying out of ingredients allowing the real gourmet experience for passengers on board. The variety of the Functional inserts allows to broil fish and meat, fry eggs or toast bread, steam vegetables or cook pasta and rice. The smart programming system with automatic processing coupled with innovative heating technology and special attention to materials ensure simple, convenient and safe handling for the operator.
